

Taktsu

ChLCD Color eBook Display

Innovative display technology beyond LCD

Cholesterol LCD technology
top stunning color gamut of 16.7 million colors

New era of reading writing and eye protection

No Blue Light: Cholesteric liquid crystal technology features no blue light, helping to reduce eye strain, making it suitable for prolonged reading.

No Backlight: Cholesteric liquid crystal displays are fully reflective with no backlight source, meaning they remain clearly visible in bright light and reduce eye strain in low light environments.

Low Power Consumption: The display consumes very little power, making it ideal for long-term use without overheating, enhancing comfort and extending the device's lifespan.

Vivid Colors: With 167,000 colors, text and images remain clearly visible in sunlight, and colors are more vibrant, improving the reading experience.

Healthy & Eco-friendly: Without a backlight and high power consumption, Taktsu generates minimal heat during prolonged use, providing an additional health benefit for users.

My Books

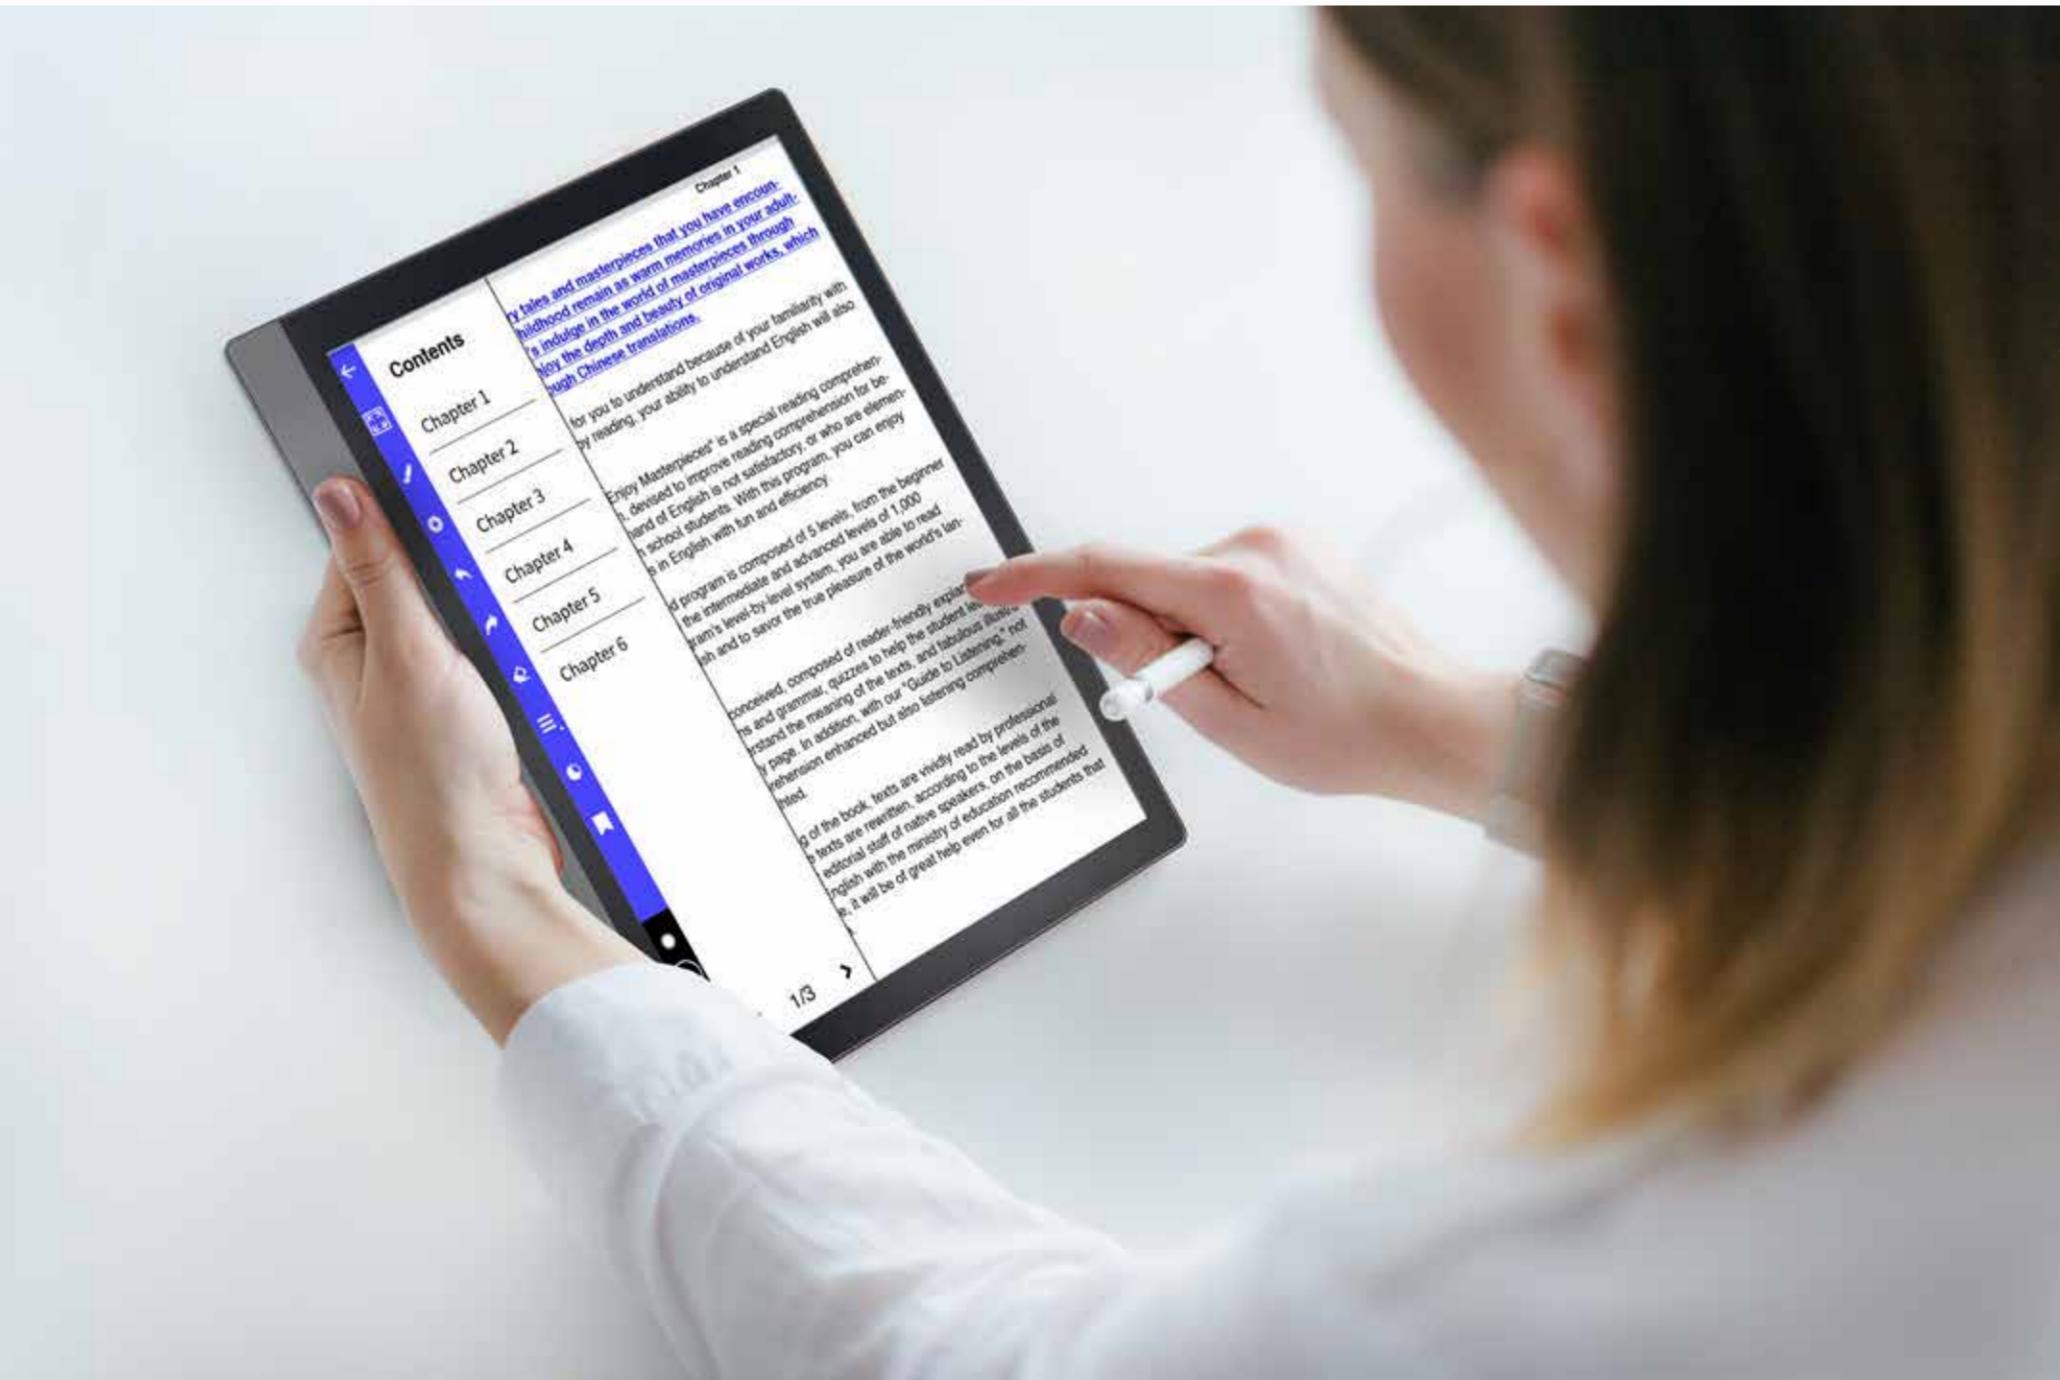

eBooks Free Upload: Upload eBooks freely.

Chapter Switching: Switch chapters at will.

Swipe Right/Left: Swipe right for the next page, swipe left for the previous page.

Reading Progress: Thoughtful recording of

Note

Smooth Handwriting Experience: Enjoy a seamless handwriting experience.

Organized File System: Files are neatly categorized.

Multiple Template Options: Various inner page templates to choose from.

Password Protection: Protect your data with a password lock.

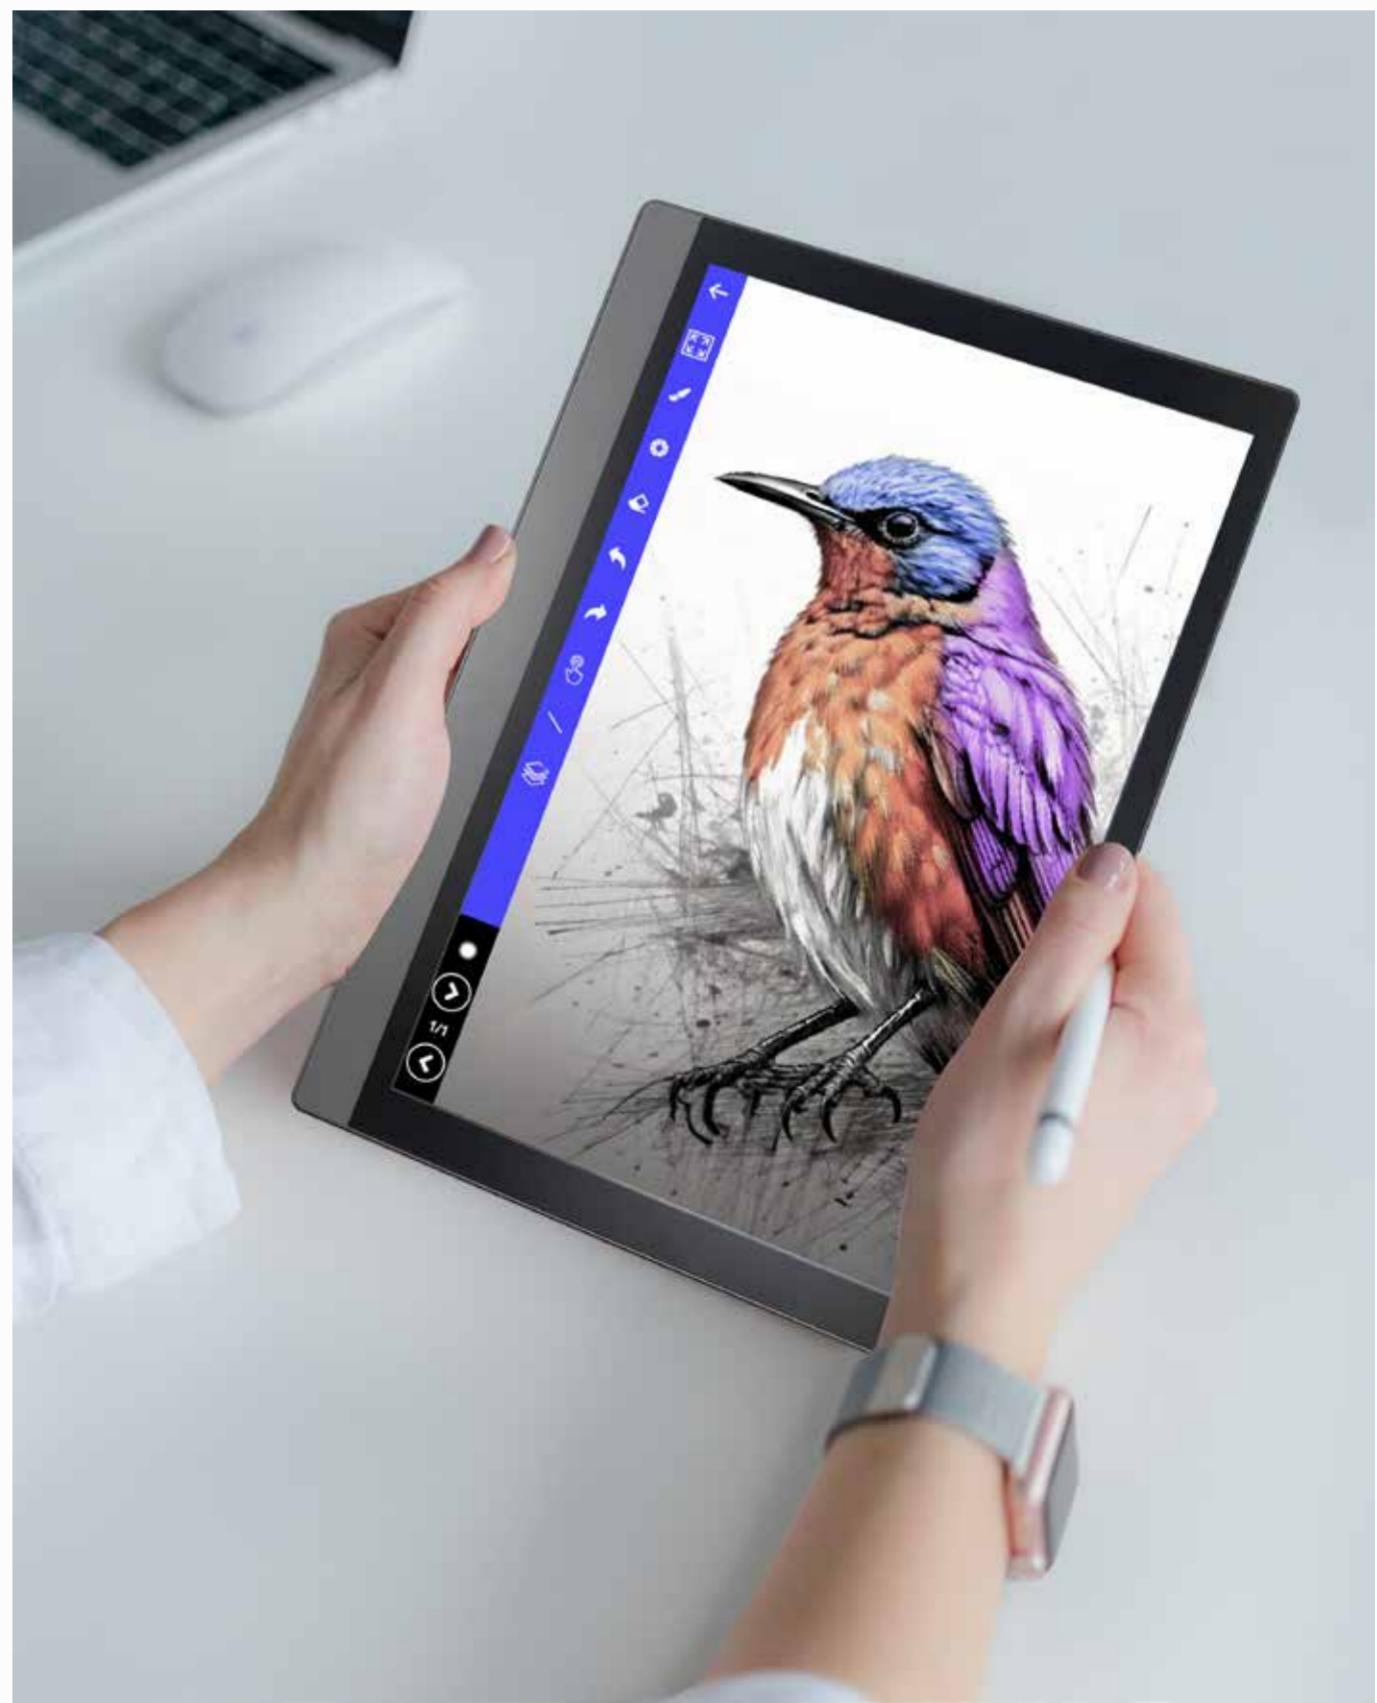

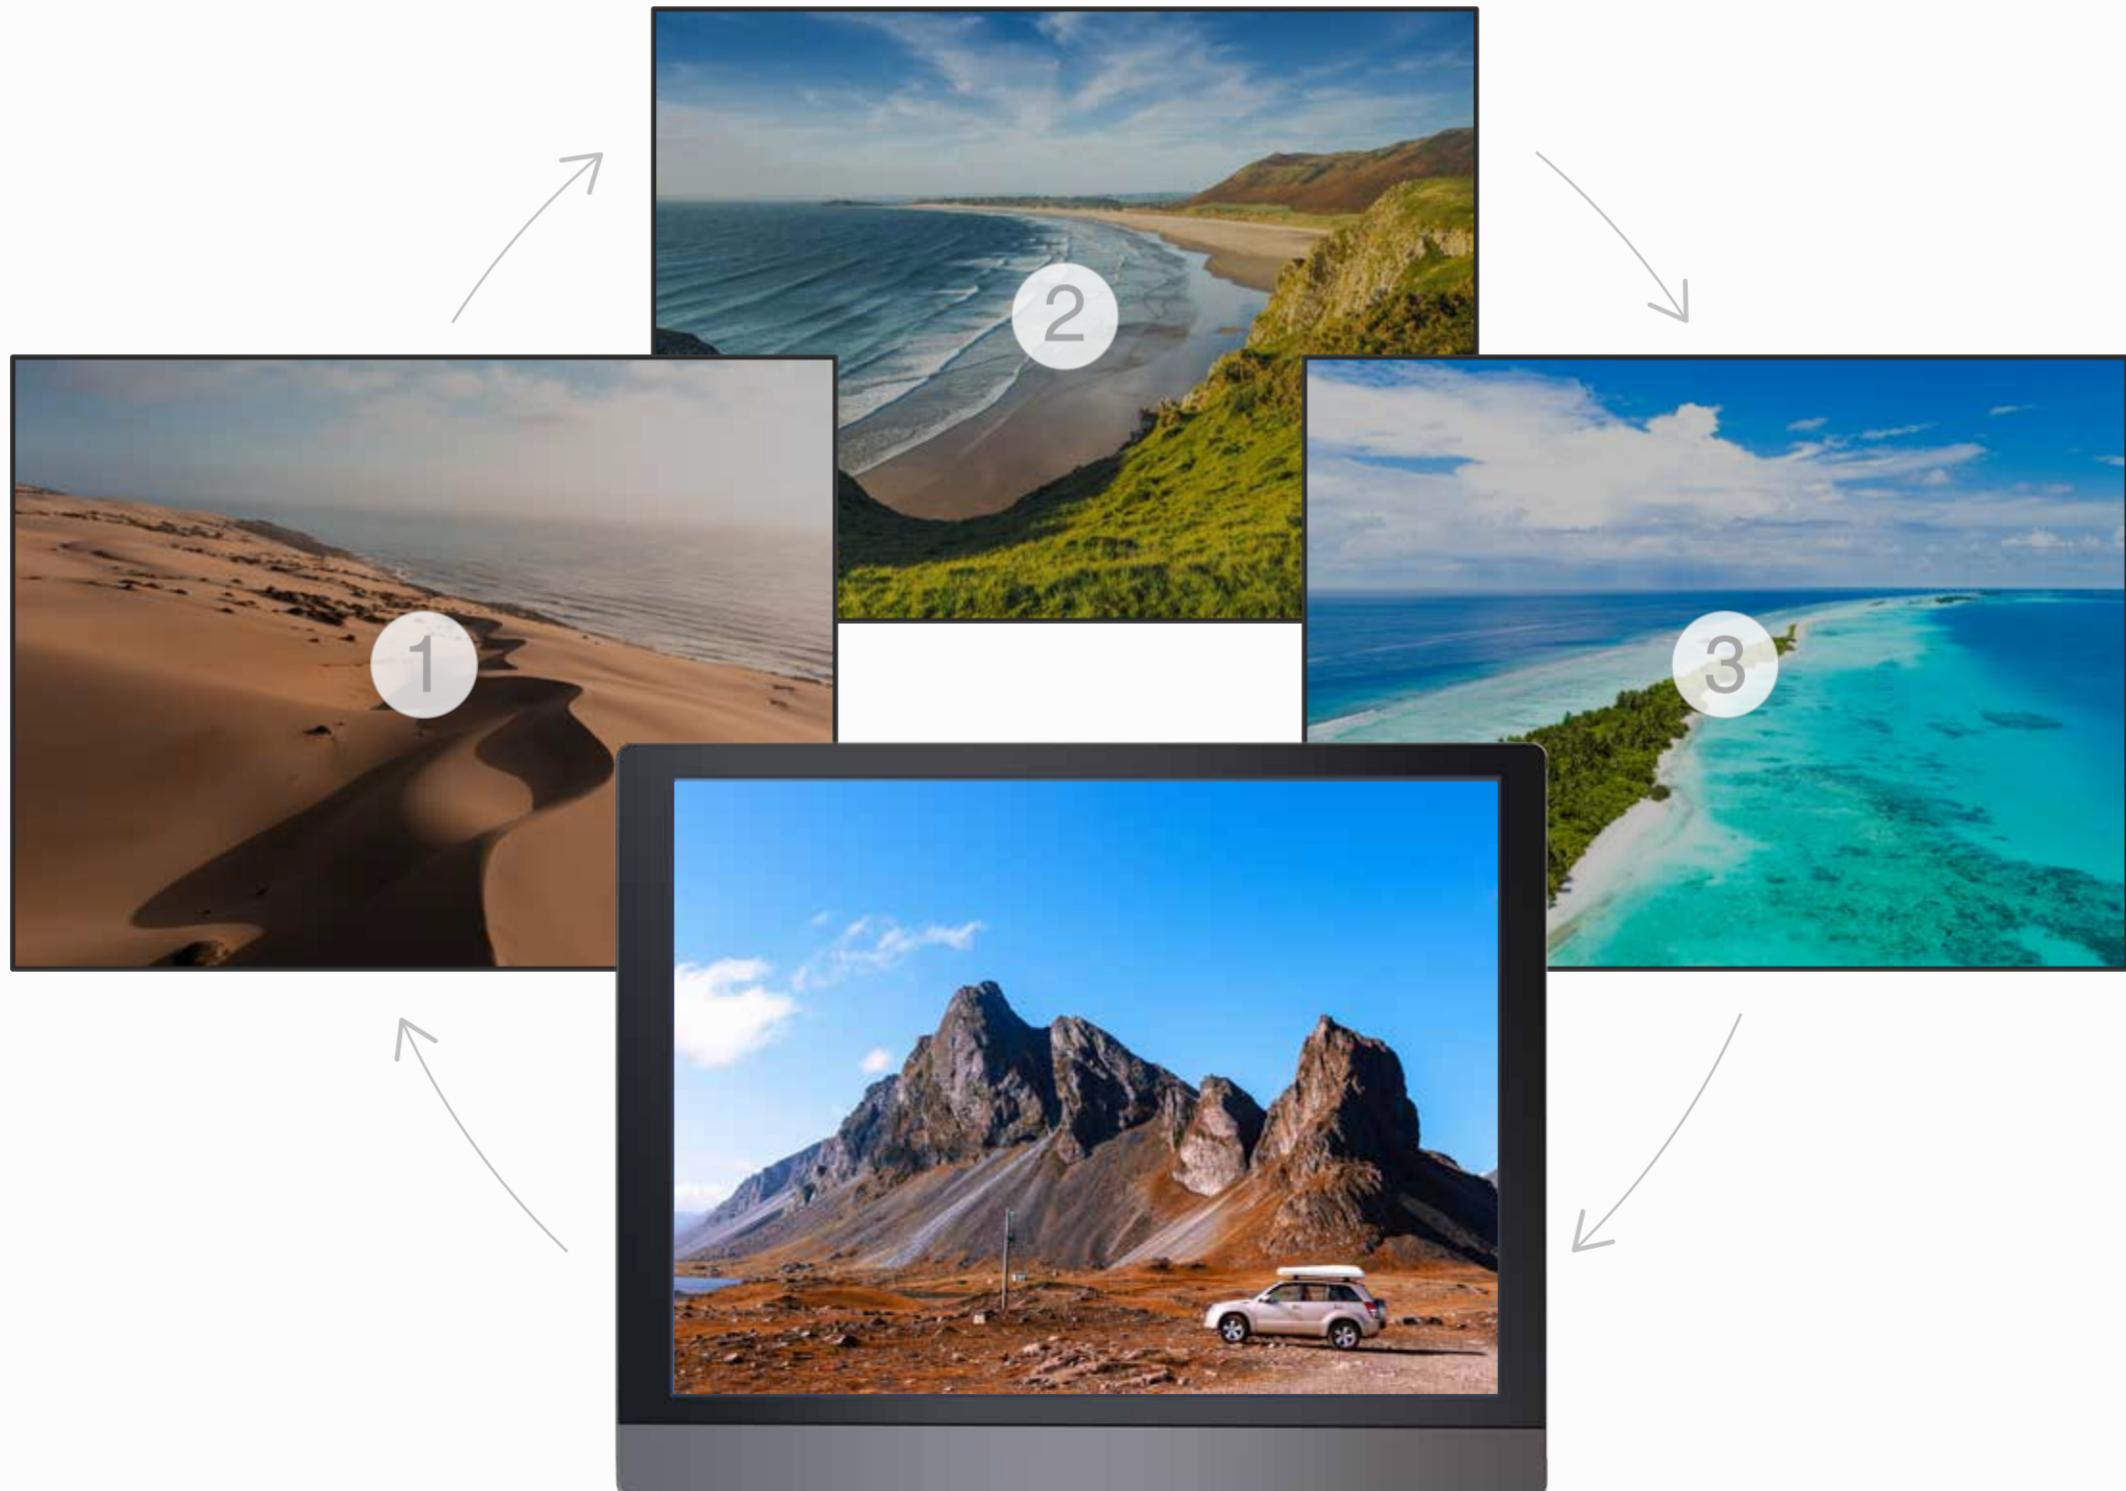

Photo Frame

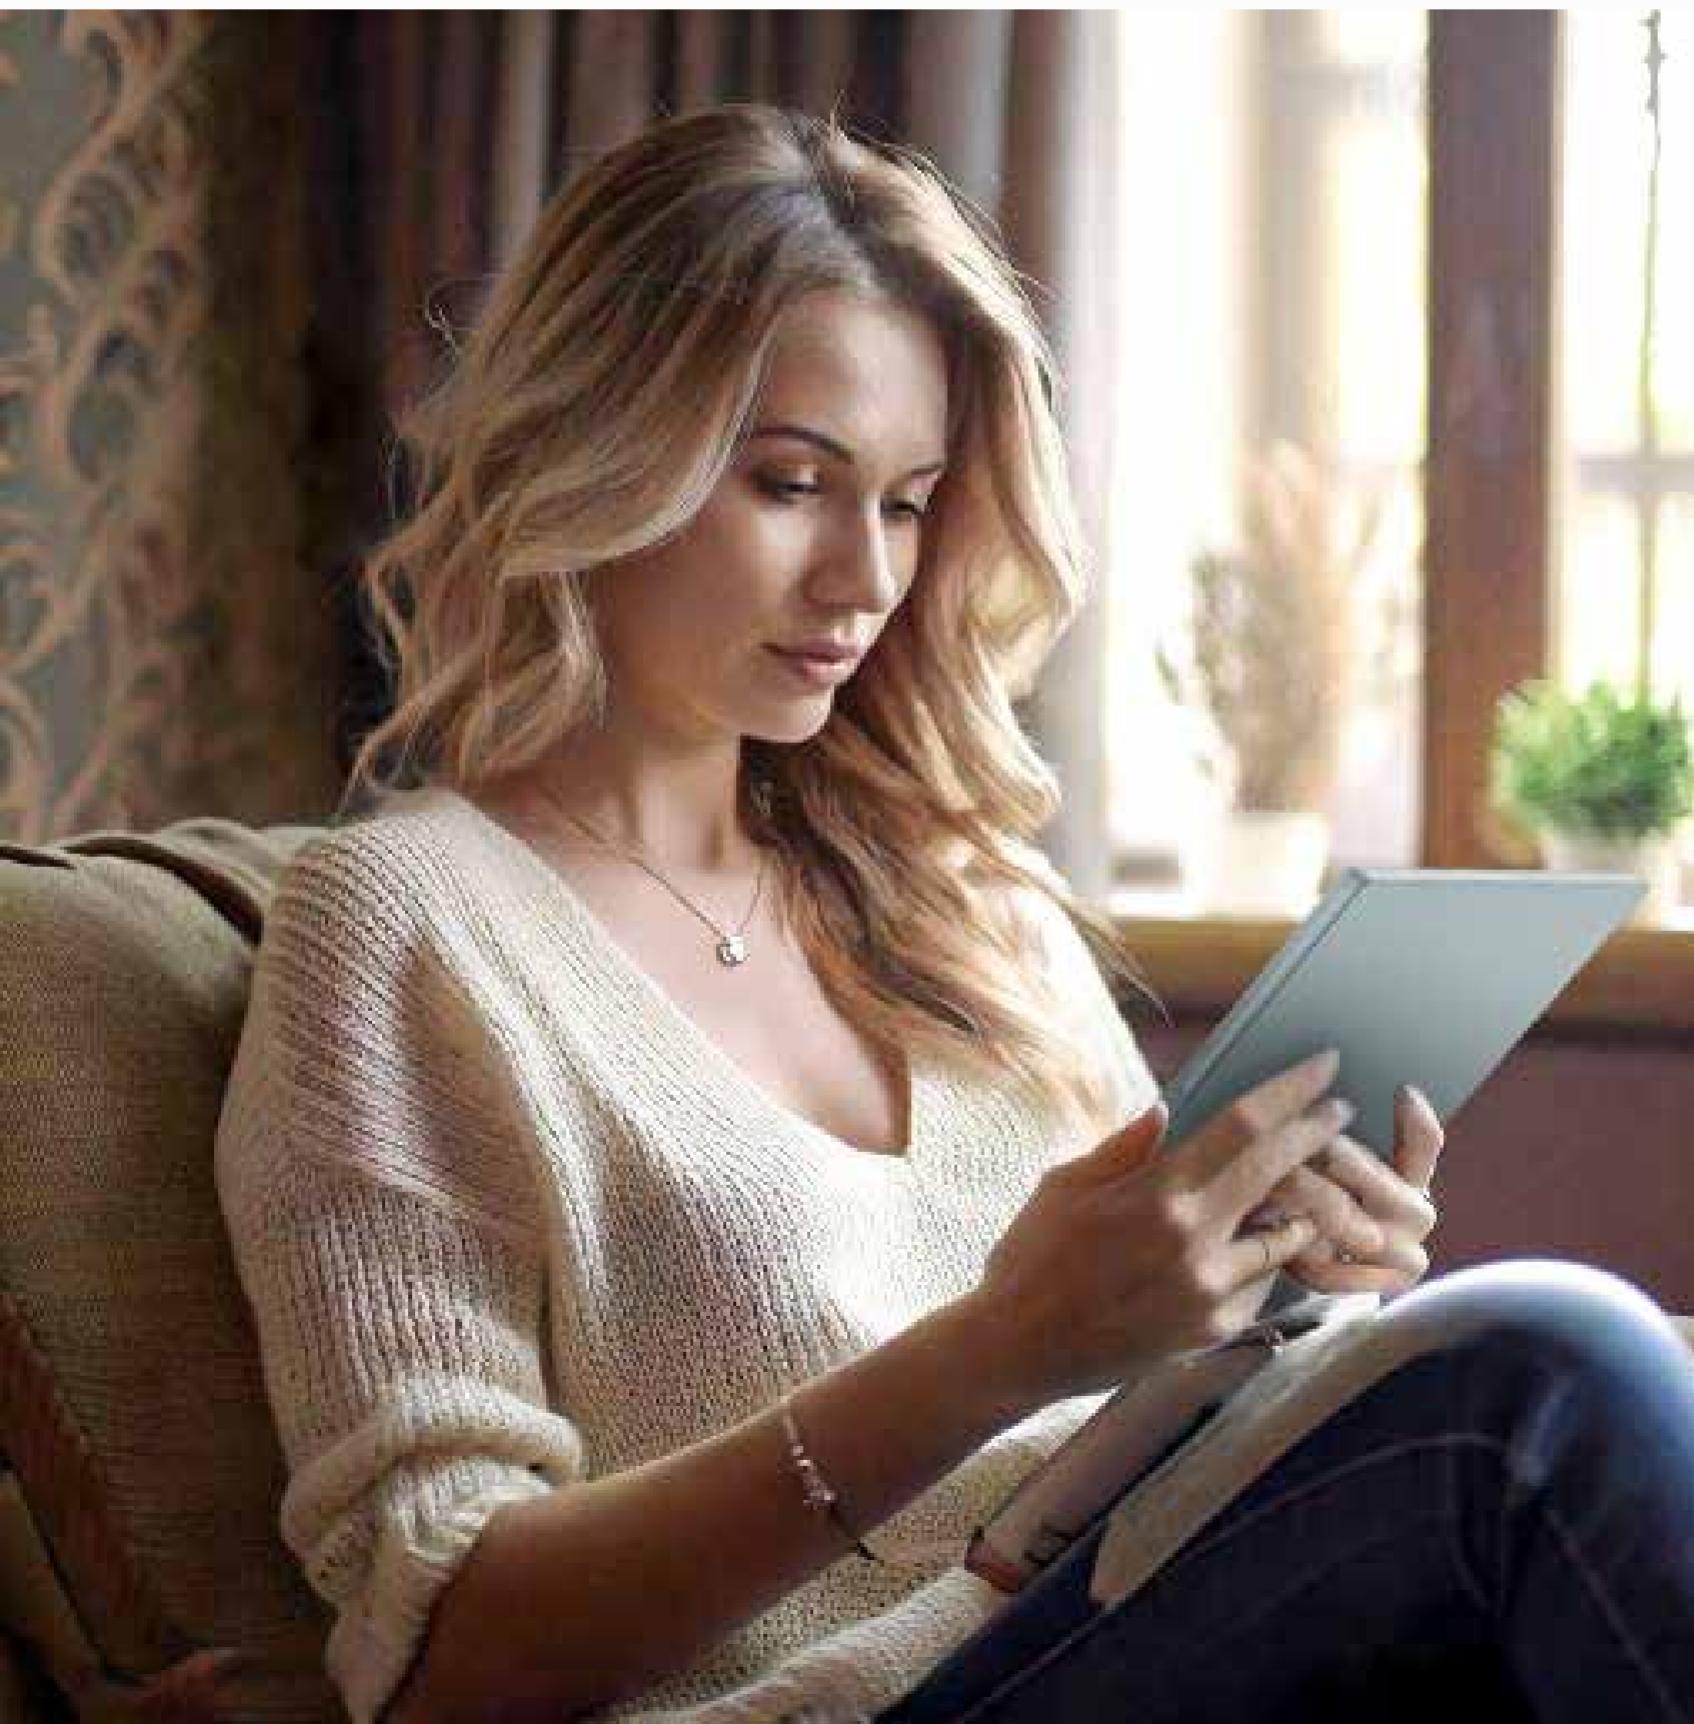

Image Zoom: Double-tap to zoom in on images.

Browse and Refresh Settings: Set refresh times and quantities.

SD Card Compatibility: Supports reading images from an SD card.

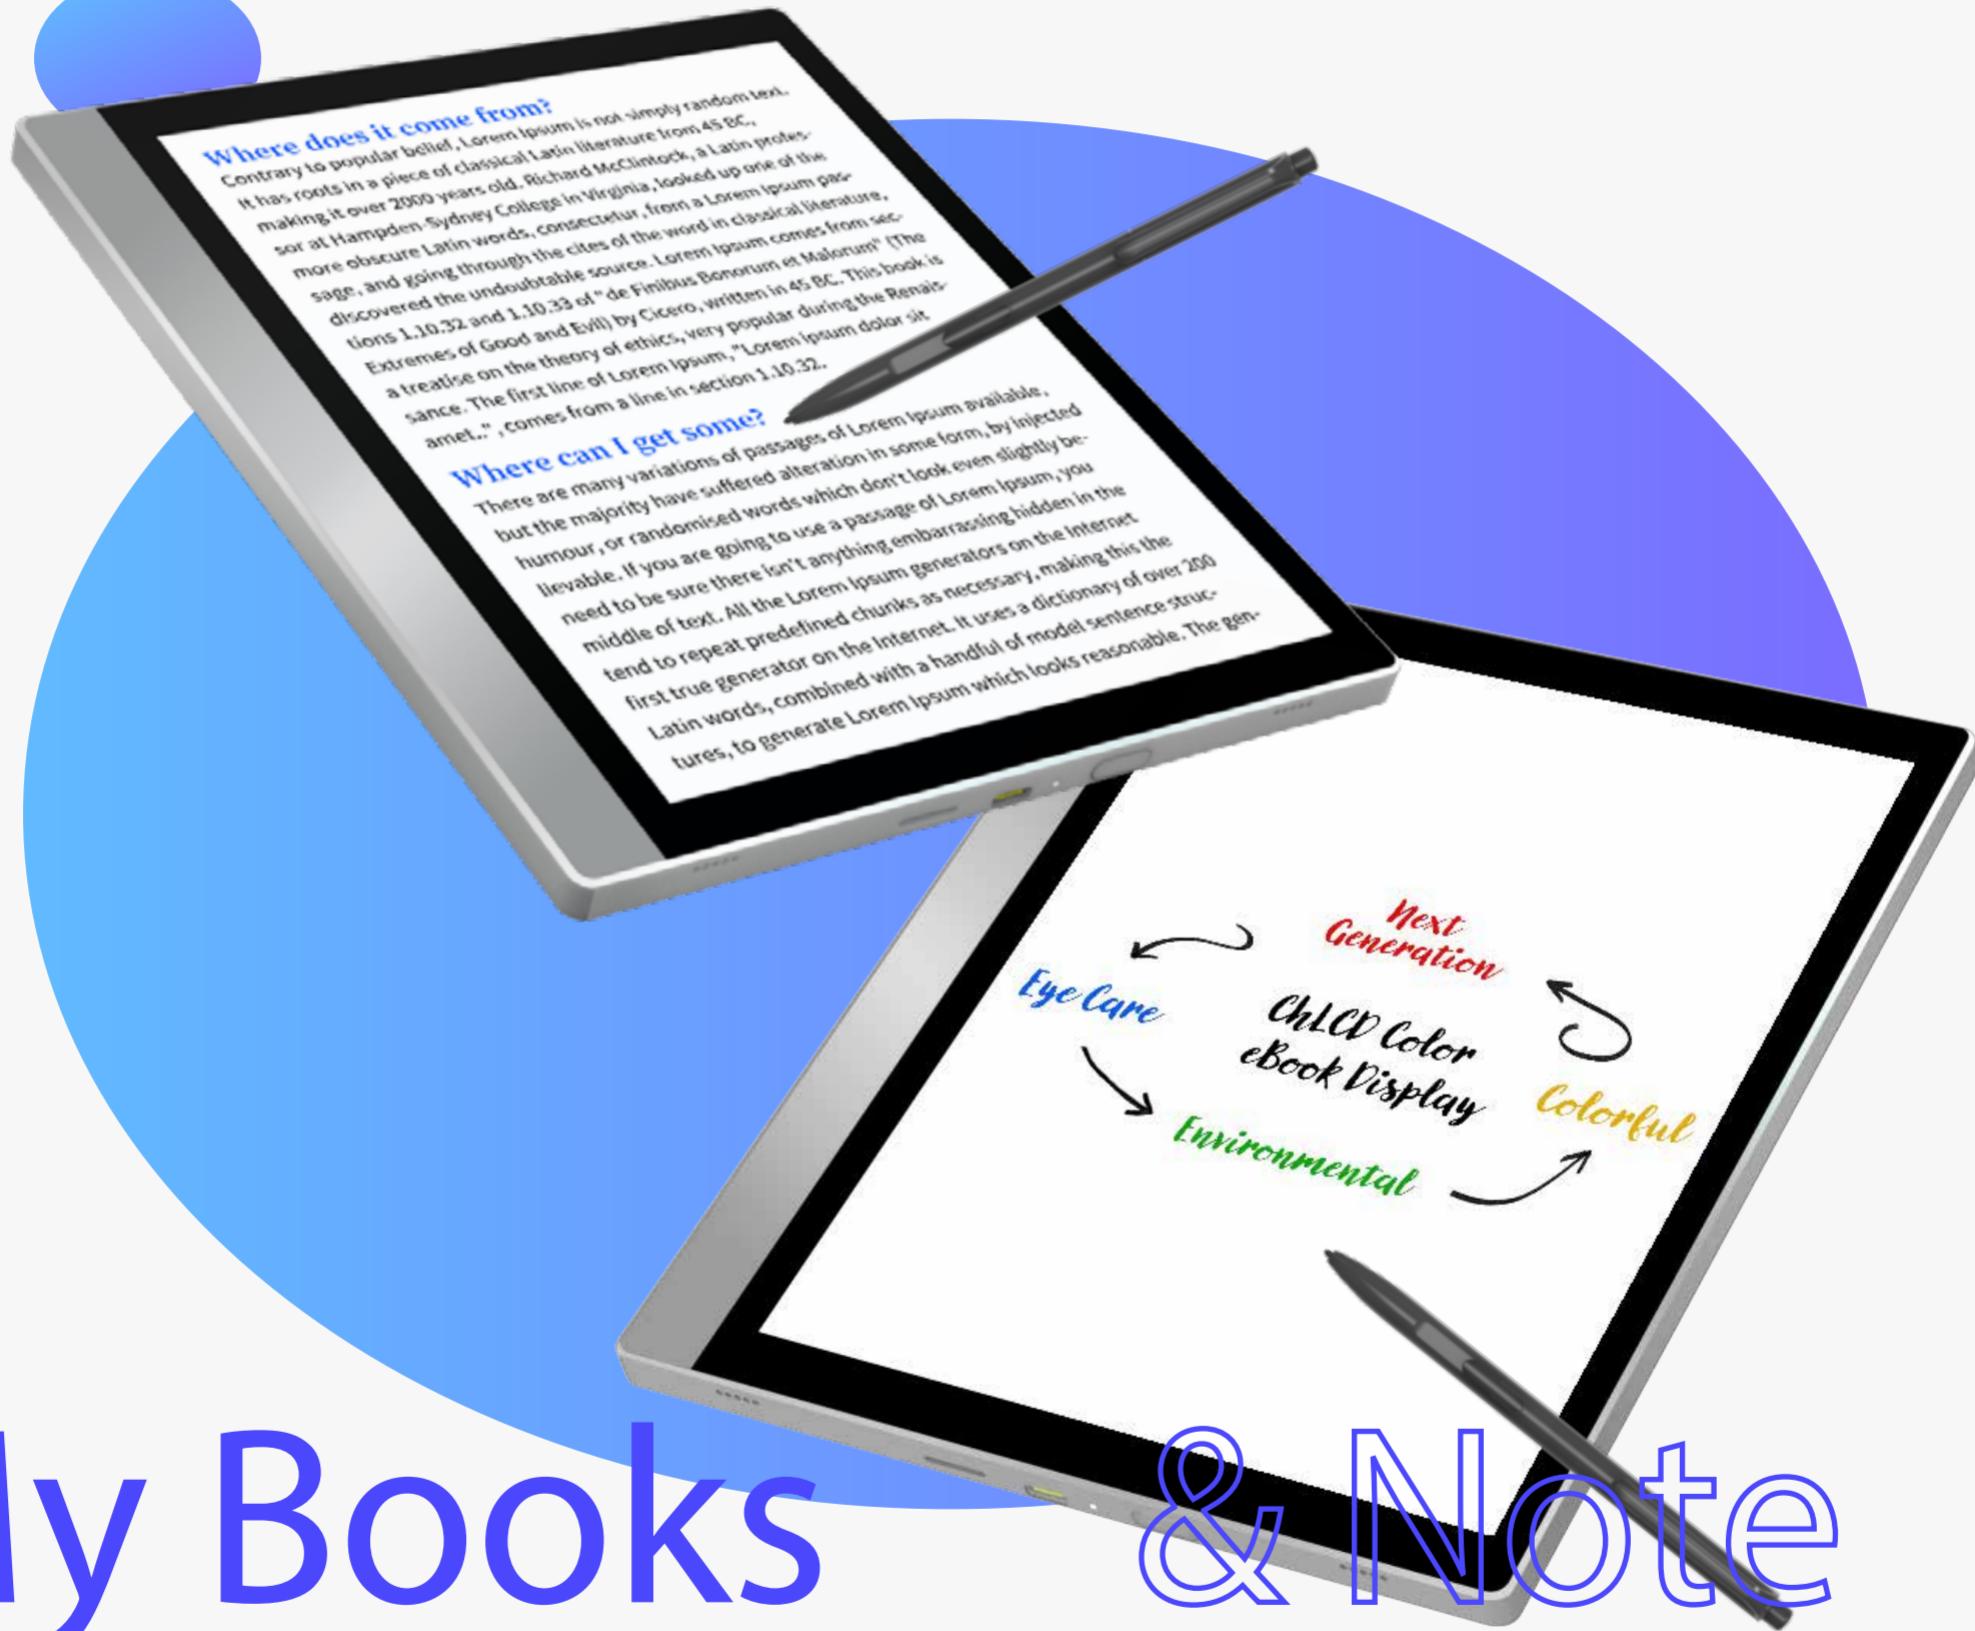

The Taktsu 10-inch full-color e-reader is the first to use Cholesteric Liquid Crystal Display (ChLCD) technology, which maintains displayed content without power consumption thanks to its bistable nature. This low-power feature is extremely energy-efficient, with vibrant colors displaying up to 167,000 colors. Refreshes in less than a second. The touch surface is made of scratch-resistant, smooth glass, and the colorful interface provides an intuitive user experience.
